

Fig. 9. Radar equivalent reflectivity images for Sept. 6, 1995. The top and middle panels are images from the NOAA  $K_a$  band radar. The top panel is for vertically pointing beam and the middle image is an RHI scan at  $270^\circ$  azimuth. The bottom panel shows data from the airborne radar (WCR) during the spiral descent; see the text for an explanation of this display.
